

*Birds,
Wings,
and
other
things*

Name.....

In GLOBE, we visit parks, beaches, mountains and deserts. We have plants growing around our feet and vines climbing over stone walls.

We learn from animals that swim, run, slither, skate, and fly. They hop in our ponds, dive into lakes, float beneath our oceans. We have birds that fly and swoop in our skies. And we discover ourselves not only in nature but awakening to being part of the whole of nature and at balance with cycles and systems we are studying.

Rob Escalante is the author and creator of these pages from his SCRABBLE book. The words listed here are a tiny sample of a gaming way to save our birds. Some are majestic, some are creative, playful, beautiful, some sing, and most can fly.

Send us your species to help others learn about your countries and about systems, habitats, and the GLOBE protocol. In the 13th Edition, we will compile what we can and create pdf vocabulary pages to help other scientists and students, young and old alike. We hope you will enjoy this sample list of words that can be used for your own projects or as a gateway in your research into entertainment with the English language.

We hope the 2021 GLOBE Conference is memorable and launches new horizons for you and humanity. Best Wishes from Bo Lebo and Rob Escalante in making your dreams come true. To order additional lists (such as Fish, Flowers, Water, Trees, Dinosaurs), or copies of Scrabble, please contact Bo Lebo at New Education Options through her email.

Send us words, notes and ideas for what you would like to see in new editions.

Birds Of a Feather -- All types of birds

Birds have been used as symbols for thousands of years. A dove represents peace or pacifism. The owl is wisdom. An eagle or a falcon indicates power. On the darker side, a crow or raven can symbolize the macabre. And calling someone "chicken" or a "dodo" is hardly a compliment. Here is a list of over 520 "bird" words you can use for Scrabble.

AASVOGEL (+S)
ACCENTOR (+S)
ALATED [*adj.* having wings.]
AEPYORNIS (+ES)
ALBATROSS (+ES)
